

Oakfield Primary School – Art

At Oakfield we believe that our Art curriculum learning will be fun and creative.

Our aspiration is to ensure that children are engaged, inspired and challenged throughout each topic and therefore enabled to continue to develop and secure their skill base.

Our children will be encouraged to use their skills to create their own independent works of art, craft and design.

In order to achieve their best potential, our children will have access to a range of good quality resources that will support each topic and enable a confident approach. There will also be an opportunity to develop a deeper understanding of Art by exploring various artists and their impact on culture and history.
